

Felt Mouse Ornament Instructions

Materials

Materials in kit:

- 1-30 mm bead
- 2-20 mm beads
- 2-12 mm beads
- 2-10 mm beads
- Thread/Twine

Materials you will need:

- Scissors

Instructions

1. Take your length of thread and fold it in half so that your two ends are next to one another.
2. Starting with one of your 10 mm beads, thread this bead onto your thread. (Tip: If getting both ends of the thread through the bead are proving difficult, try wrapping a small piece of tape around the thread ends.)

3. After your 10 mm bead is threaded, continue to thread the remaining beads in the following order: 12 mm, 20 mm, 30 mm, 20 mm, 12 mm, 10 mm. This will create the graduated pattern we are trying to achieve for this ornament.
4. Once your beads have all been threaded, shift them on the thread to allow enough room for you to double knot the thread ends, and another double knot at the top of the beads, by the thread loop. Knotting the thread at both locations will help to keep the ornament's shape and make it easier to hang somewhere.
5. If a double knot does not prove to be large enough to prevent the beads from coming off the ornament, you can try knotting it additional times to make the knot bigger.
